Hardcoded Quality

RepliOS

OutSys delivers innovative carrier-grade solutions and services to implement, simplify, and speed up the integration, provisioning, management, and testing processes in the Broadband Service Providers Networks and their Information Technology Systems

Active Member of the Broadband-Forum

Solution

RepliOS Multiplatform Programmable Telephone Responder

Introduction

**RepliOS is a Central Office
Multiplatform Programmable
Telephone Responder with
Interactive Voice Response (IVR)
and Call-Deflection extensible
capabilities**

Multiplatform

**Hardware and Software
ISDN and TCP/IP-VoIP-SIP
Interfaces are fully
supported**

Call-Reply-Message

**Programmable Call-Reply-Message
controlled by rules based on
calling/called numbers, date/time, etc.**

**I.e. Play Messages in different
languages according to the
prefix country code calling number**

Call-Deflection

**Programmable Call-Deflection
controlled by rules based on
calling/called numbers,
date/time, etc.**

Flexible Response Actions

**Call-Reply-Message and Call-Deflection
can be alternatively performed on the
same Called Number accordingly to the
programmed rules**

**A Call-Deflection can be performed
after a Call-Reply-Message**

Management

**RepliOS has its own user-friendly
administrative WebGUI Dashboard**

**Integrated SNMP, and e-mail
malfunction alarms**

Text-to-Speech Integration

**Fully integrated with the main
Cloud Text-to-Speech Services
(Google, AWS, etc.)
for the generation of audio
Call-Reply-Messages**

Security and Delegation

RepliOS built-in hierarchical granular multi-tenant design allows Called-Number management delegation within the Broadband Service Provider's departments or even with external customers
